Optimized Application Portfolio
Rationalize your application footprint

Access these servicenow products for 6 weeks:

- Enterprise Architecture
- SPM
- ITOM
- ITAM
- Automation Engine
- Performance Analytics

What You Get

Modernized applications on one low code platform with AI agents: **reduce sprawl, eliminate waste, add governance**

Outcomes

- ☑ Solidify transformation plans for critical legacy applications that must remain.

- ☑ Identify and retire redundant applications.

- ☑ Effective cost management and analytics to support application usage.

- ☑ Single pane of glass for legacy application footprint and cost.

- ☑ Intact Time-based guarantee to deliver this value in 6 weeks.

Cost Visibility

150K – 200k

Disclaimer: The price will not exceed the range provided but may vary within it based on agency-specific requirements, complexity, and scope of implementation.

How it Works

☑ **Step 1**

Intact works with you to **design, build, enable, and integrate** a solution that derives the most valuable outcomes. Our build includes:

- **Maturity Assessment** to determine best achievable outcomes.
- **Initial workshop** to engage and align stakeholders to goals.
- **Deployment** of each of the products included in this suite.
- **Exception-based design** around pre-built workflows for Government.
- **Migration of your applications** and supporting portfolio data into ServiceNow for use with the products activated.
- **Agile builds** focused on establishing application definitions and service portfolios, process adoption and improved analytics for application management.
- **Analytics** on application spend and usage.

☑ **Step 2**

After 6 weeks:

- You have a foundation for a **long-term permanent solution**, but the products are disabled and ready for purchase if desired with data preserved.

This solution is part of the Government Transformation Suite (GTS) offering.
